CHAINS

The following field notes are those of the dependent resurvey of a portion of the subdivisional lines and the metes-and-bounds survey of the North Maricopa Mountains Wilderness Area Boundary, Township 3 South, Range 2 West, Gila and Salt River Meridian, Arizona.

The history of surveys pertaining to this dependent resurvey and survey is as follows: The south and west boundaries were surveyed by W. H. Thorn, W. G. Shapcott and W. K. Kierulff in 1915-16. The subdivisional lines were surveyed by W. H. Thorn and W. G. Shapcott in 1916.

The survey was executed in accordance with the specifications as set forth in the Manual of Surveying Instructions, 1973, and the Special Instructions dated October 21, 1993, for Group No. 762, Arizona.

Preliminary to the resurvey, the lines of the original survey were retraced and search was made for all corners and other calls of the record. Identified corners were remonumented in their original positions; lost corners were restored and monumented at proportionate positions based on the original record. The retracement data were thoroughly verified and only the true line field notes are given herein.

The directions of all lines were determined by direct hour angle observations on the sun, and refer to the true meridian. Distances and angles were measured with a Lietz Set 2B II total station.

The geographic position of the 1/4 sec. cor. of secs. 20 and 21, as determined from a tie made to U.S. Geological Survey triangulation station "BOW 1936", located in the southwest quarter of section 29, Township 3 South, Range 2 West, is as follows:

Latitude: 33°09'09.39" N. Longitude: 112°28'39.74" W. NAD 27

The mean magnetic declination as taken from quadrangle map MOBILE NW, ARIZ., published in 1973 and photoinspected in 1978 by U.S. Geological Survey, is 13 1/2° E.

GENERAL DESCRIPTION

The land encompassed in this survey is located approximately 36 miles southwest of Phoenix, Arizona and approximately 21 miles northeast of Gila Bend, Arizona. The general elevation is 1200 feet above sea level. An 800 ft. high ridge passes through sections 9, 14, 15, 23 and 24. The land varies from mountainous to flat and gently rolling, broken with numerous dry washes and drains. The vegetation consists of palo verde, ironwood, cactus, creosote, and sparse native grasses.

Primary access is by way of United States Highway 80. Secondary access is by way of a natural gas pipeline maintenance road through sections 4, 9, 10 and 14, and numerous unimproved trail roads.
